Careers in Meteorology and Atmospheric Science

By Institute for Career Research

Createspace, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.METEOROLOGY IS THE STUDY OF THE atmospheric conditions that cause weather on earth. Most of these conditions occur in the troposphere, the layer of the atmosphere closest to the earth. Meteorologists can predict future weather conditions by studying patterns in temperature, air pressure, and water vapor. The media, private sector companies, and government agencies use these predictions to manage air and ocean traffic, predict crop yield, budget water, and in many other important ways. Weather is everywhere and so are meteorologists. These professionals can be found all over the world doing all sorts of interesting things. Some study the ozone layer and look for ways to prevent air pollution or global climate change. Some monitor rainfall and issue flash flood warnings, or fly in specialized aircraft to investigate hurricanes. Most work for government agencies, such as the National Weather Service, providing vital information to the public as well as the aviation, marine, and fire control communities. Beyond the government, the fastest growing area for meteorologists is private forecasting. Private forecasters serve clients with very specific needs for highly...
