Neuware - Diploma Thesis from the year 2002 in the subject Business economics - Investment and Finance, grade: 1,0, University of Vienna (Sozial- und Wirtschaftswissenschaften), language: English, abstract: Inhaltsangabe:Abstract: In corporate finance two major decisions have to be made. One is the investment decision which means companies must decide which available opportunities they should invest in. The other one, the financing decision, also known as the capital structure decision, tries to answer the question of from where the money to finance investment projects should come. Money can either be raised internally, through retained earnings, or externally. Mezzanine capital, as a special type of external finance, therefore falls into the area of the financing decision. Although the use of mezzanine capital has increased in Europe in recent years, this special type of finance is still relatively unknown in some countries. Therefore, the purpose of my thesis is to familiarise the reader with this particular type of finance. It is structured in a way that it sequentially deals with the following questions: How did mezzanine develop Can it offer an advantage...
